Forgotten Books, 2017. Hardback. Condition: New. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Excerpt from Flight Investigation of Wing-Gun Fairings on a Fighter Type Airplane The instruments used in all the tests were a recording air-speed meter installed on the airplane air speed line and a three-element control-position recorder recording the movements of the elevator, rudder, and ailerons. Tufts were installed on the upper surfaces of the wings and in some cases in the immediate vicinity of the gun fairings to aid in the study of the behavior of the airplane at the stall. The locations of the two 0.50 - caliber machine guns in each wing are illustrated in figure 2. Figures 3 through 7 are photographs of the various types of gun fairings tested. In figure 3(e) are shown the submerged gun in its unfaired condition and the projecting gun fitted with the fairing submitted by the Grumman Company. The Grumman fairing resembles an engine cowl in appearance except that the space between the gun barrel and the fairing was sealed with rubber grommet. Figure 3(b) shows the projecting gun in its unfaired condition with the submerged gun removed. The Grumman fairing which was the only fairing used on the projecting guns was at first tested as submitted. In later tests the grommet was removed and the edge of the opening was bent in so as to provide an annular space about inch in width around the gun barrel for the entry of cooling air. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an...
