

Archives of Neurology and Psychiatry Volume 2

By American Medical Association

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1919 Excerpt: .on the flexor carpi radialis, palmaris longus, flexor carpi ulnaris, on the biceps flexor cruris, semi-membranosus and semitendinosus. In muscles where a tendinous attachment is wanting. Stoffel's operation on the peripheral nerves may be used. The latter method is especially useful in spasticity affecting the quadriceps extensor and adductors in the lower extremity and the pronators, biceps, coraco-brachialis, brachialis anticus, etc., in the upper extremity. In the long flexors of the fingers the Stoffel operation is to be recommended as simpler than the attack on the numerous tendons. The same holds true for the flexors of the toes. With the relief of the spasticity in the operated muscles voluntary movement returns in the antagonists. Unfortunately, by this method the source of the spasticity is not removed; the centripetal impulses continue so that in severe spastic conditions there is a return of the condition. For a...
