Hoover Institution Press,U.S. Paperback. Book Condition: new. BRAND NEW, Breaking the Environmental Policy Gridlock, Terry L. Anderson, The contributions to this volume demonstrate how the principles of fiscal responsibility and individual accountability that have been applied to economic and social policies - essentially free market principles - can be applied successfully to environmental policy. The authors offer ten commonsense reforms as a starting point, all based on the compelling arguments that a new system of positive incentives can get us more environmental quality at lower cost. These reforms include land lease programs for nontraditional commodity production, long-term transferable land permits, landowner compensation for regulated endangered species property, and performance-based (as opposed to technology-based) water and air pollution laws.
