

## Rendering Techniques &apos;97

Filesize: 8.89 MB

### ***Reviews***

*Complete manual! Its such a great study. It really is writter in straightforward phrases rather than hard to understand. You are going to like the way the article writer create this publication.*  
*(Ike Fadel)*

Book Condition: New. Publisher/Verlag: Springer, Wien | Proceedings of the Eurographics Workshop in Saint Etienne, France, June 16-18, 1997 | Der Band fast die aktuellsten Forschungsergebnisse auf dem Gebiet der Bildverarbeitung zusammen. Forscher und Entwickler an Universitäten und aus der Industrie diskutieren die verschiedenen Möglichkeiten der Bildaufbereitung. Schwerpunkte sind:- Illumination and Reflection Models- Sampling (filtering, anti-aliasing)- Visibility Algorithms- Monte Carlo and Finite Element Techniques- Numerical Methods and Analysis- Color Perception (the human visual system in the loop)- Texture (models, analysis and synthesis)- System and Software Architecture for Rendering | The book contains the proceedings of the 8th Eurographics Rendering Workshop, which took place from 16th to 18th June, 1997, in Saint Etienne, France. After a series of seven successful events the workshop is now well established as the major international forum in the field of rendering and illumination techniques. It brought together the experts of this field. Their recent research results are compiled in this proceedings together with many color images that demonstrate new ideas and techniques. This year we received a total of 63 submissions of which 28 were selected for the workshop after a period of careful reviewing and evaluation by the 27 members of the international program committee. The quality of the submissions was again very high and, unfortunately, many interesting papers had to be rejected. In addition to regular papers the program also contains two invited lectures by Shenchang Eric Chen (Live Picture) and Per Christensen (Mental Images). The papers in this proceedings contain new research results in the areas of Finite-Element and Monte-Carlo illumination algorithms, image-based rendering, outdoor and natural illumination, error metrics, perception, texture and color handling, data acquisition for rendering, and efficient use of hardware. While some contributions report results from more efficient or elegant algorithms, others pursue new and experimental...
